Thomas picks a chocolate out of a bag.

There are 4 white chocolates and 5 milk chocolates.

He eats the one he picks out then gets a 2nd.

Complete the tree diagram and find out the probability of 2 white chocolates.

```
                                    W
                          W
                                    M
                                    W
                          M
                                    M
```

Answer:
